

# Introducing the LN-160 Layout Navigator

Built with versatility in mind, the LN-160 Layout Navigator is ideal for site layout work as well as delivering precise 3D positioning guidance for machine control with excavators, compact track loaders, and more.

A single operator can:

- Layout 3D designs
- Complete MEP work
- Place anchor bolts
- Verify as-built
- Perform earthmoving machine control for trenching and grading
- ..and more.

## External power supply connector

The LN-160 boasts a long-lasting power supply, fortified by an external supply connector, ensuring uninterrupted operation throughout the day.

## Improved MC-Mobile LPS Support

Seamless integration for machine control. It allows one operator to lay out forms, position anchor bolts, verify plans, and guide compact equipment.

## Improved Vertical Range

The LN-160 now features an expanded vertical grade range of +55° to -32°, enhancing its capability to handle various angles of depression effectively.

# Introducing the LN-160 Layout Navigator

## Instrument features:

- Layout or measure up to a range of 426 ft (130 meters)
- Dedicated for use with Topcon Field, Digital Layout, and/or Pocket 3D software
- Easy auto-leveling, one-button setup
- Lightweight job site mobility
- Single-operator operation
- Laser plummet
- LongLink™ Bluetooth®
