

PREMIUM MEASURING AND MARKING TOOLS

Now featuring the new SOLA digital series and patented SOLA FOCUS vial technology.

PREMIUM MEASURING TOOLS MADE IN AUSTRIA

Since 1949 the SOLA brand has meant high precision measuring and marking tools. As experts in measuring and marking, we manufacture a wide range of products for professional builders. Our “passion for precision” means we continuously develop and optimize our products to meet the needs of our most demanding users. Characterized by consistent simplicity, efficiency and precision, SOLA innovations set the standard on a worldwide scale in many applications from civil engineering to interior construction. SOLA is a family-owned Austrian company and known as the market leader in premium spirit levels.

Over 75% of all products are manufactured in Goetzig, Austria, where our headquarters and production facilities are located. This is where our 200 employees work every day to get the world's best box beam levels into the hands of users in more than 70 countries in the world. Our production has a very high level of vertical integration: All plastic components such as end caps, handles, vial holders, etc. are manufactured on one of our 50 injection molding machines.

To make sure the products meet your expectations as closely as possible, we set high quality standards which are subjected to constant control in our own laboratories and testing facilities. Since June 2018 we are ISO 9001:2015 certified by Quality Austria. This system provides quality assurance for all areas of the company. All levels are built under these high quality assurances, which require multiple human and machine tests. Every single level and its components are tested before leaving our company.

24 DISPLAY OPTIONS

NEW. INNOVATIVE. STRONG.

► **LATERAL MAGNET INSTALLATION**

While in conventional magnetic spirit levels the magnets are inserted directly into the measuring surface, SOLA uses a newly developed lateral installation method. The advantages: a smooth measuring surface, outstanding adhesive force and maximum stability and precision.

▲ ▲ ▲ magnets ▲ ▲ ▲

▲ ▲ ▲ magnets ▲ ▲ ▲

► **GO! SMART**

DIGITAL INCLINOMETER WITH BLUETOOTH

The digital GO! smart combines the functions of a spirit level, an inclinometer and a protractor in one single device. Equipped with a backlit display and a magnetic base with a V-groove, this compact device has versatile applications. The Bluetooth interface means that it can be used together with the free SOLA Measures app, giving you access to useful additional functions.

► **BIG RED DIGITAL LEVELS WITH BLUETOOTH**

The BIG RED digital levels are ideal to use anywhere where inclinations, slopes and angles need to be measured quickly and precisely. These digital levels are highly precise, with an integrated electronic inclinometer module and Bluetooth interface to use with the new SOLA Measures app.

► **TLM2 DEEP HOLE MARKER**

The TLM2 deep hole marker marks drill points in holes quickly and easily up to a depth of 1.7 inches (45 mm). Made from ABS plastic, the screw-on attachment converts the deep hole marker into a mechanical pencil for convenient marking, writing and drawing on a wide range of materials and surfaces.

► **HPL/HPL3 HIGH PRECISION LEVELS**

The super precise HPL has highly sensitive vials. This means the bubble reacts more quickly than in standard levels when lifting one end of the level. Even the smallest deviations are displayed, which ensures greatest measurement precision. It is ideal for adjusting door frames and windows.

SPIRIT LEVELS

WHY SOLA HAS THE WORLD'S BEST BOX BEAM LEVELS

The most accurate work demands a product of superior quality. At SOLA, we believe that professional builders know best what works for them. That's why we work closely with you, developing our levels to meet those needs. Our goal is to supply the world's best levels – levels that remain consistent, even in the most demanding conditions on construction sites.

Professional tradespeople have been putting their trust in SOLA levels for years. Each component of a SOLA level is designed to make measuring as easy as possible, to help you work more efficiently and to provide you with greater precision.

BEST FEATURES FOR BEST MEASURING EXPERIENCE

Highest accuracy

With deviations less than 0.0003 in./in. (0.3 mm/m, 0.017°) in standard position and less than 0.0005 in./in. (0.5 mm/m, 0.029°) in inverted position, our BIG RED is the most accurate box beam level in the world.

Milled edges

For best leveling results, our BIG RED levels come with only one milled bottom surface. By designing our levels around a single measuring surface, we are able to achieve our extraordinary accuracies.

Extraordinary robust

Our sturdiest level, BIG RED, has an extra strong aluminum profile (0.61 lbs/ft., 890 g/m) with reinforcing ribs. That profile is engineered to handle relentless use and accidental abuse without losing its shape.

Lateral magnet installation

We use a newly developed lateral installation method for all our magnetic spirit levels. The advantages – a smooth measuring surface, outstanding adhesive force and maximum stability and precision.

Shock-absorbing end caps

Two shock-absorbing end caps protect the level in case of a fall or shock. Equipped with an anti-slip surface, our BIG RED and digital levels allow for convenient positioning and a secure grip of the level on the measured surface.

Ergonomic handles

Depending on the length, our BIG RED levels come with two handles. These ergonomically designed handholds provide a comfortable grip and added convenience on our most precise tools.

With our experience and know-how, we can make the limited lifetime warranty with confidence.

COMPARE THE DIFFERENCE

4x higher contrast over ring vials

Compared with ring vials (right), our FOCUS vials (left) enable users to more quickly, accurately and easily read a level. FOCUS vials are designed with a narrower field of vision and green end caps. Their color is reflected by the leveling bubble, creating unparalleled contrast between the bubbles edge and the FOCUS printing.

+60% magnification of bubble

Our patented FOCUS vial technology (left) enhances the bubble with a magnification of +60%. Your benefit: The bubble movement is more visible and reading errors are reduced to a minimum – even from a distance.

Special composition of vial liquid

The FOCUS fluid (left) is not affected by electricity and will not fade under sunlight. Furthermore, the strictly guarded composition of our fluid prevents bubbling in case of shock. Our formula performs without problems at a greater range of temperatures than any other level vial.

SOLA FOCUS: THE WORLD'S BEST VIAL

The most important spot on a level is the ½-inch span “between the rings” of the vial. It’s that space that determines if your job is done, or if you need to tweak things a little bit more. As a professional, you look at that space a lot – multiple times a day.

After talking to hundreds of professional builders, we challenged ourselves to come up with a solution to make your daily work easier. The result is the patented SOLA FOCUS vial.

In 2011 we invented this technology and stopped using ring vials in our premium levels. The reason was simple: Over 80% of professional level users we surveyed overwhelmingly preferred the SOLA FOCUS vial. SOLA FOCUS vials provide a 4x higher contrast than ring vials. This allows an easier, faster reading and more precise measuring.*

* Source: results of the analysis “Contrasts of vial bubbles”. V-Research, November 2010.

Break-resistant acrylic material

SOLA FOCUS vials are made of break-resistant acrylic material. Besides its resistance to deformation or breakage, the acrylic is highly UV resistant. Our patented ultrasonic welding of the vials ensures no leaks.

Luminous backing

Every horizontal SOLA FOCUS vial is equipped with a luminous backing beneath the vial. This fluorescent light plate enables easier reading in low light situations without any LEDs.

SOLA MEASURES APP: MEASURING & MANAGING DATA

Measure angles, bevels, inclinations or gradients, determine whether a surface is level or plumb, record your measurements and manage measured values. SOLA Measures is the multifunctional app for builders who want to connect their digital SOLA measuring tools, such as the BIG RED digital spirit level or the GO! smart inclinometer, to their smartphone or mobile device via Bluetooth.

The free SOLA Measures app supports you with every measurement and leveling. Switch on Bluetooth and your digital SOLA measuring tool will be connected to the app in a matter of seconds. Your advantage: access to smart additional functions, such as remote reading and remote control, take pictures with real-time data, save measured values as well as manage and share them.

MARKING

WHY SOLA PENCILS ARE IDEAL FOR MARKING

SOLA pencils are simply indispensable, regardless of your requirements. We produce them using high-quality basswood, making our pencils sturdy and easy to sharpen.

What's more, our pencils are environmentally friendly as they are coated with paint that is free from heavy metals.

MARKING FOR HARD-TO-REACH PLACES

Marking reference points for fixing and drilling is often frustrating, especially when those points are in hard-to-reach spots.

The SOLA TLM2 deep hole marker is equipped with a thin, stainless steel nib to easily mark drill holes, indentations or hard-to-reach places. Moreover, this marker can be used for writing and simple markings.

TLM2 for markings up 1.7 inches depth.

TLM2 used as mechanical pencil.

TLM2 with integrated sharpener.

A BRIEF STORY OF SUCCESS: SOLA + KESON = KESON LLC

Keson and SOLA are both family-owned, third generation companies. In 2018, the two families behind the Keson and the SOLA brands forged an alliance and formed a company, Keson LLC. Both companies are leaders in measuring and marking tools, offer complementary product lines and share very similar values. The goal of this alliance is to provide North America with the most innovative, accurate, durable and easy-to-use measuring and marking products possible.

With a combined 120 years of market experience, the Keson and SOLA alliance builds upon Keson's U.S. manufacturing, existing distribution network and strong relationships by adding SOLA's European manufacturing expertise, precision-engineering and industry-leading technology.

Our common commitment to integrating feedback and our uncompromising focus on service enable us to earn and to keep the trust of professional level users and tradespeople.

Trusted Measuring and Marking Products Since 1968
